

DOMAIN NAME WATCH

MILLIONS OF DOMAIN NAMES ARE REGISTERED EVERY MONTH. ARE ANY INFRINGING YOUR RIGHTS?

In the digital age, protecting your domain name against new registrations that could be used to redirect website traffic and reduce your revenues is an increasing issue.

With businesses using multiple brands and new domain names available regularly there can often be thousands of relevant global matches that need to be considered.

We monitor domain names as they become available or are registered across the globe. This provides a report of relevant domain names so you can act quickly to protect your online brand and trademarks.

As part of CPA Global, TMDS has monitored domain names and trademarks worldwide for 60 years, benefitting more than 5000 clients.

BENEFITS

- Quickly informs brands of relevant global domain name availability
- Regular registration alerting enables fast action against conflicting domain names
- Audit report to identify issues
- Registrant information assists with legal disputes
- Reduces administration and saves time at a highly competitive cost

FEATURES

- Global Internet coverage, monitoring all new extensions
- Implementation of exact string and wild-card monitoring to source relevant domain names
- Expert advice and support to customise searches
- Identification of phishing sites
- Recording of relevant domain names
- Regular reports accessible via email or online
- Online filtering by domain name, registrant or country
- 24 months data archiving

ABOUT TMDS, PART OF CPA GLOBAL

CPA Global is the world's leading intellectual property (IP) management and IP software specialist, and an international provider of outsourced legal services.

With offices across Europe, the United States and Asia Pacific, we support many of the world's best-known corporations and law firms with a range of IP and broader legal services, helping them to manage risk, cost and capacity, and to realise greater value for their businesses.
